# Relocations / Downsizing Drive Demand, Leased Square Feet Set To Exceed Pre-Pandemic Levels By Year-End

#### HIGHLIGHTS

- With leased square feet already exceeding total square feet leased in 2020, the market is on track to meet or exceed pre-pandemic levels by year-end.
- Lease activity continues to escalate with relocations and downsizing continuing to drive demand.
- Despite early speculation that office demand could be negatively impacted by the pandemic, vacancy is at a five year low of 4.32%.
- The ROCK Demand Index (RDI) reveals that 46% of office demand is comprised
  of new businesses. The remaining 54% are existing businesses relocating or
  acquiring an additional location.
- 87% of office leases were signed in Greater York East, an area rich in Class A and Class B product.

#### OVERVIEW

After a strong start in Q1, leased square feet in Q2 exceeds total square feet leased in 2020. Demand continues to shift from large to smaller units as large office users contemplate mitigating building expense.

An increase in lease rates this quarter is attributed to Class A, triple net leases pushing upwards of \$14/SF. These Class A leases were primarily 10,000 SF or greater. Amidst rising lease rates, the York Market offers favorable lease rates compared to the Philadelphia or Baltimore metros. Corporations making a move to the area can expect to cut their rent expense by 50% as lease rates in larger metros continue to exceed \$35/SF.

With leased square feet already exceeding total square feet leased in 2020, the market is on track to meet or exceed pre-pandemic levels by year-end. The bulk of activity continues to be driven by relocating and downsizing to mitigate rent expense.

On-site and nearby amenities have become a focal point for Class A office users as they relocate or downsize their office footprints. Amenities can include access to wellness features such as gyms, daycares or walking trails and entertainment/cultural activities such as restaurants, bars and bustling city centers.

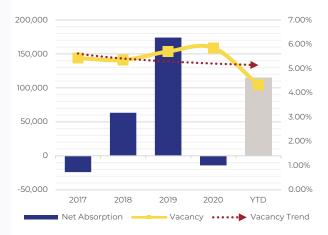

The ROCK Demand Index (RDI) reveals that 46% of office demand is comprised of new businesses. The remaining 54% are existing businesses relocating or acquiring an additional location.

After peaking at 6.09% in Q3, 2020, York County continues to deviate from a national trend of increasing vacancy. Vacancy decreased 98 basis points this quarter to 4.32% and trends well below the national average of 17.2%.
